## Education

### 2016-2020

Bachelor | Tashkent University of Informational  
Technologies

During my time at Tashkent University of Information Technologies from 2016 to 2020, I pursued a Bachelor of Science degree in Computer engineering. This program provided a comprehensive foundation in Software engineering, web development and OOP, equipping me with a solid understanding of Object-oriented design and programming proficiency, Knowledge of software engineering principles and best practices.

During my undergraduate studies, I actively applied theoretical knowledge in practical settings by undertaking several independent projects. These projects, hosted on my GitHub repository, showcase my hands-on experience and commitment to applying classroom concepts to real-world scenarios.

### 2021 - 2023

Master | Namseoul University

### Chonan

While my master's program primarily focused on the intersection of technology and entrepreneurship, I have complemented my formal education with self-directed learning in computer science. Through online platforms such as Udemy and others, I have undertaken courses in Web Developer Bootcamp and 100 days of Python from Angela Yu to enhance my technical skills. This self-directed learning has equipped me with a solid foundation in computer science, enabling me to bring a unique blend of business and technical expertise to the professional arena.

By combining my formal education in Global Techno Entrepreneurship with self-directed learning in computer science, I am well-positioned to contribute to innovative projects that require a multidisciplinary approach to problem-solving.

## Work experience

### 2019 - 2020

Fergana Urological Clinic, Fergana, Uzbekistan

### ICT Specialist

- At Fergana Urological Clinic, I commenced my professional journey as an ICT Specialist. In this role, I played a pivotal role in ensuring the seamless operation of technology infrastructure crucial to medical professionals. My responsibilities included providing technical support to doctors and staff, resolving issues related to computer hardware, printers, and Wi-Fi connectivity.
- During this period, the clinic implemented the MedControl ERP program, a comprehensive solution that automated various aspects of clinic management, including work queues, payments, laboratory operations, dormitory management, doctor scheduling, accounting, and HR functions. I assumed a crucial role in managing and troubleshooting this system, offering support to medical staff, and ensuring the effective utilization of the database associated with the ERP program.
- My proactive approach to problem resolution and commitment to ongoing support were instrumental in maintaining the efficiency of critical systems in a healthcare setting. I collaborated with medical professionals to understand their workflow requirements, providing training sessions, and contributing to the optimization of internal processes.

2020 -2021

Fergana Global Textile, Fergana, Uzbekistan

### **System administrator**

- During my tenure as an ICT Specialist and System Administrator at Fergana Global Textile, I undertook the responsibility of managing the Egemen ERP system. This intricate platform, developed by Turkish programmers, played a pivotal role in optimizing our business processes. My duties extended beyond typical ICT responsibilities, as I actively engaged in troubleshooting and technical issue resolution.
- Given the international nature of our workforce, consisting of over 1500 employees, I found myself playing a critical role in facilitating communication between native workers and the diverse team of international experts. My proficiency in English served as a bridge, ensuring seamless interaction and understanding among team members.
- Recognizing my aptitude for effective communication and strategic planning, I was promoted to the position of Planning Manager within a mere six months of joining the organization. In this elevated role, I took charge of planning initiatives, collaborating closely with various departments to fine-tune production schedules and resource allocations. The intricacies of project management became a focal point of my responsibilities, where I successfully oversaw project lifecycles, ensuring timely completion and delivering on predefined objectives.
- Simultaneously, I embraced the role of a translator, leveraging my linguistic skills to break down language barriers and enhance communication within the global team. This dual role allowed me to contribute not only to the technical aspects of our operations but also to the cultural cohesion of our diverse workforce.
- Beyond my official responsibilities, I demonstrated a commitment to continuous learning. After regular working hours, I dedicated personal time to expanding my programming skill set. This proactive approach not only enhanced my technical proficiency but also contributed to the ongoing improvement of internal processes.
- In summary, my experience at Fergana Global Textile encompassed a multifaceted role, blending technical expertise, managerial responsibilities, linguistic proficiency, and a dedication to continuous improvement. This holistic approach allowed me to make meaningful contributions to the organization's success.
